Hello, I'm Dickson

Software engineer building websites, apps and connected systems.

I'm Head of Systems at ChemCheemi Africa and a software engineer at Ecowater International. I build websites, web systems, mobile apps and chatbots, and connect them to banks, mobile money and SMS.

8 years experience | Based in Tanzania | Work in Tanzania, Uganda & Malawi

WHAT I DO

Three things I'm good at

Websites & web systems

Company websites and custom systems, from the first conversation to launch and support.

Mobile apps & chatbots

Flutter and Android apps, and WhatsApp bots that take orders and answer customers.

Integrations & IoT

Connecting systems to banks, mobile money, SMS, meters and devices, and bringing it all into one cloud.

WEBSITES

PROJECTS

Systems and apps I've built

TapCloud
IoT platform

Connects and monitors devices remotely. Built at ChemCheemi.

Ecowater Cloud
Cloud system

Runs Ecowater's operations in Uganda and Malawi, linked to local banks and mobile money.

Ecowater Store App
Android

Lets our new stores send their data straight to the cloud.

Mr. Majik
WhatsApp bot

Customers use it to order water products.

MajikDrive
Mobile app

Drivers manage and track water deliveries.

EFA
Cashier system

Cashiers register students and top up water cards.

ESMS
Mobile app

For managing stores remotely.

EcoPlus
WhatsApp bot

University students register, check timetables and vote.

Bookify
Web system

Hotel and apartment bookings with room availability.

Meter integration
IoT

Connected Gasify Energy's meters to the cloud so data comes in automatically.

EXPERIENCE

Where I've worked

2023 – now

Head of Systems

ChemCheemi Africa

- Responsible for all of the company's systems, from planning to delivery and support.
- Built TapCloud, our IoT platform, and added AI features to our products.
- Integrated our systems with banks, mobile money and SMS providers.

2023 – now

Software Engineer

Ecowater International, Dodoma

- Build the software behind water ordering, deliveries, retail and payments.
- Part of the team that built the new cloud system for Uganda and Malawi.
- Built Mr. Majik, MajikDrive, ESMS, EFA and the Android store app.

2019 – now

Freelance Web & Software Developer

Self-employed

- Websites and custom systems for businesses and individuals.

Gasify

Technical Team

Gasify Energy

- Connected our meters to our cloud system.

2018 – 2023

MITz Kits & StadiSpace Manager

MITz Group Company, Mwanza

- Managed the company's main projects and teams.
- Started student programmes and designed STEM learning kits.

2014 – 2018

BSc in Software Engineering

University of Dodoma

SKILLS
