TOOLS

Git · VS Code · Android Studio

CORE STRENGTHS

- Team leadership
- Project & delivery management
- Stakeholder communication
- Problem solving
- IT troubleshooting
- Data analysis & reporting

Dickson Rutha

Software Engineer · Head of Systems

PROFILE

I'm a software engineer who builds software that businesses rely on every day. Over the last eight years I've built web systems, mobile apps and WhatsApp chatbots for companies in Tanzania, and I've led the projects and teams behind them. Today I'm Head of Systems at ChemCheemi Africa, where I look after our IoT platform and AI work, and I also build software for Ecowater International. I'm comfortable owning a product from start to finish: understanding what the business needs, building it, and keeping it running after launch.

EXPERIENCE

Head of Systems
2023 – Present

ChemCheemi Africa

- Responsible for all of the company's systems, from planning and architecture through to delivery and support.
- Built TapCloud, our IoT platform for connecting and monitoring devices remotely.
- Added AI features to our products and internal workflows.
- Integrated our systems with banks, mobile money and SMS providers.
- Work with management to decide what we build next and make sure it gets delivered.

Software Engineer
2023 – Present

Ecowater International Limited · Dodoma

- Build and maintain the software behind water ordering, deliveries, retail and payments.
- Built Mr. Majik, a WhatsApp bot customers use to order water, and MajikDrive, the app our drivers use for deliveries.
- Built ESMS for managing stores remotely and EFA, the cashier system for water card top-ups.
- Review code, test releases and fix issues in production.

MITz Kits & StadiSpace Manager
2018 – 2023

MITz Group Company · Mwanza

- Managed the company's main projects and the teams working on them.
- Sent monthly financial and technical reports to senior management.
- Started student programmes and designed STEM kits for hands-on learning.

PERSONAL DETAILS

NATIONALITY
Tanzanian

LANGUAGES

English	Fluent
Swahili	Native

HOW I WORK

- I like owning a project from start to finish
- I can explain technical things to non-technical people
- I stay calm and deliver under tight deadlines
- I work well on my own or leading a team
- I keep up with new tools and pick them up quickly

INTERESTS

- Reading
- Music
- Football (playing & watching)
- Travel
- Meeting people

PROJECTS

TapCloud · IoT platform
Connects and monitors devices remotely. Built at ChemCheemi.

EcoPlus · WhatsApp chatbot
Lets university students register, check timetables and vote.

Mr. Majik · Chatbot
Customers use it to order water products.

Bookify · Web system
Reservations for hotels and apartments, with room availability tracking.

ESMS · Mobile app
For managing stores remotely.

EFA · Cashier system
Cashiers register students and top up their water card balances.

MajikDrive · Mobile app
Drivers manage and track water deliveries to customers.

Integrations · APIs
Connected our systems to banks, mobile money and SMS providers for payments and notifications.

EDUCATION

2014 – 2018
BSc in Software Engineering
University of Dodoma

2012 – 2014
Advanced Certificate of Secondary Education (ACSEE)
Galanos Secondary School

2008 – 2011
Certificate of Secondary Education (CSEE)
Hai Day Secondary School
