CORE STRENGTHS

- Team leadership
- Project & delivery management
- Stakeholder communication
- Problem solving
- IT troubleshooting
- Data analysis & reporting

Dickson Rutha

Software Engineer · Project Manager

PROFILE

Software engineer with a BSc in Software Engineering and 5+ years of experience building web and mobile products and managing technology projects. Currently a Software Engineer at ChemCheemi Africa, building IoT and AI-powered products. I have built WhatsApp chatbots, booking systems and Flutter mobile apps used in day-to-day operations, and I have led teams that delivered STEM education programmes. I work well where technical delivery has to meet business goals, and I'm used to running several projects at once while keeping management informed.

EXPERIENCE

Software Engineer
2023 – Present

ChemCheemi Africa

- Built **TapCloud**, an IoT platform for connecting, monitoring and managing devices.
- Develop AI-powered features and integrate AI tools into the company's products and workflows.
- Design, develop and maintain web and mobile applications that support the company's operations.
- Work with stakeholders to turn business requirements into reliable, well-tested software.
- Take part in code reviews, debugging and releases to keep quality high.

Software Engineer
2022 – 2023

Ecowater International Limited · Dodoma

- Designed, built and maintained software for Ecowater's water-delivery, retail and payment operations (see Key Projects).
- Delivered customer-facing WhatsApp chatbots and Flutter mobile apps for ordering, deliveries and store management.
- Worked with the team to design, build and test applications against business requirements.
- Took part in code reviews, debugging and troubleshooting to keep releases high-quality.

MITz Kits & StadiSpace Manager
2018 – 2023

MITz Group Company · Mwanza

- Managed delivery of the company's key projects, keeping them on schedule and to requirements.
- Provided management support across all company projects: led project teams and coordinated resources.
- Gave senior management monthly financial and technical status reports, raising issues and risks early.
- Started student programmes and designed hands-on STEM learning kits so students could learn by doing.
